Suggested Student Exercises:

1. Groups of students to collect examples of and discuss various sample based studies across many fields: e.g. consumer behaviour, unemployment rates, educational standards, elections, medicinal trials etc.
2. Non-random sampling: The students have to identify one group of people or behaviour that is unique or rare and for which snowball sampling might be needed. They have to identify how they might make the initial contact with this group to start snowball rolling.
3. Give the students the electoral list of an area (<http://ceo.gov.in>). The students have to draw a random sample of n number of respondents.
4. Give the students a questionnaire from any public opinion survey and ask them to identify the type of variable.
